North Dakota Tree Selector

Elm, Siberian - Ulmus pumila

A very hardy, fast growing tree with brittle wood which is subject to breakage. Extremely susceptible to insect, disease, and herbicide damage, which makes it an undesirable tree. Often confused with Chinese elm (*Ulmus parvifolia*) which is not hardy in North Dakota. The largest tree in North Dakota is 60 feet tall with a canopy spread of 55 feet.

General		
Family	Ulmaceae - Elm	
Hardiness	To Zone 3	
Leaves	Deciduous	
Plant Type	Tree	

Growth	
Growth Rate	Fast
Mature Height	25-45'
