RE-Planted:

5/28/11

Herbicide: 6/20/11

Fertilized: (170 lbs. N)

5/25/11

Harvested: 10/17/11

[joel.ransom@ndsu.edu](mailto:joel.ransom@ndsu.edu)

There was repeated waterlogging at this site. There was no statistical significant difference for yield so do not use these data for hybrid selection for yield. However, these data may be useful in determining susceptibility to green snap.
