2013 CERTIFIED SEED
GROWERS DIRECTORY

THE PURPOSE OF CERTIFICATION

The purpose of Seed Certification is to maintain and make available to the public sources of high quality seeds and propagating materials of superior varieties so grown and distributed as to insure genetic purity and identity. Only those varieties that contain superior germplasm are eligible for certification. Certified seed is high in varietal purity and of good seeding value.

Varieties eligible for certification have resulted either from natural selection or through systematic plant breeding. In either case, without a planned method for maintaining genetic purity, there is grave danger of losing varietal identity.

Varietal purity is the first consideration in Seed Certification, but other factors such as weed seed, diseases, viability, mechanical purity, and grading are also important. One of the most effective methods of preventing the wider distribution of weeds is to plant weed free seed. Adverse effects of plant diseases can be reduced by planting clean seed from disease free fields. Properly cleaned and graded seed is easier to plant and gives more uniform stands.

Seed Certification in SD is designed, therefore, to maintain not only the genetic purity of superior crop varieties but also reasonable standards of seed condition and quality.

PLEASE NOTE!

The following list of seed growers includes only those fields planted with Foundation or Registered seed and who have made application for certification. These fields have passed all inspections to date.

Certification can be completed only after the seed has passed all certification tests and standards. **FINAL CERTIFICATION** will depend on a satisfactory laboratory analysis conducted on representative samples of the conditioned (cleaned) seed lot.

The growers listed will, therefore, accept only tentative orders that will be filled if seed is finally certified. Such seed must be designated by the Certification tag, if bagged or a completed bulk transfer certificate, if seed is sold in the bulk. Seed offered for sale without this documentation cannot be considered Certified Seed.

The South Dakota Crop Improvement Association and Seed Certification Service are not marketing organizations; hence, inquiries for seed should be made directly to the growers listed.

Neither the South Dakota Crop Improvement Association nor the Certification Service assumes any financial responsibility regarding seed listed, although every attempt has been made to insure high quality seed which conforms to the certification standards.

Please report any irregularities.
