

# NDSU/UMN Potato Late Blight Spore Trapping Network

August 5-12 UPDATE  
August 12-19 Report

More filters arrived for the week of August 5-12. An updated report for this time period found no late blight spores during this time period (Figure 1). The week of August 12-19 reported no late blight spores in the 14 traps that arrived (Figure 2). As the legend in the map indicates, green dots indicate no late blight spores recovered at the marked locations and grey dots indicate no report.
