Acres in this field _____ Sampled Identification (4 digit maximum) ___ _ _ _

Last crop or land use in 20___ . _____ Yield _____

Crop to be grown in 20___ . 1st Choice _____ Yield Goal _____

2nd Choice _____ Yield Goal _____

Locate field

Note any problems with this field _____

Soil sampling – Take 20 subsamples per field, dry soil soon after sampling. See our website for more information.

Depths to sample – Opposite each test (see below) are the depths required to make a recommendation for that nutrient. For example, a phosphorus recommendation requires a 0-6" sample, while a nitrogen recommendation requires at least a 0-6" and a 6-24" or a 0-24" sample. Place each 0-6", 6-24" 0-24" or 24-48" composite sample in a separate container.

Check tests requested

Depths required for a recommendation

- Nitrogen 0-6" and 6-24" or 0-24" and 24-48" if interested in deep N
- Phosphorus 0-6"
- Potassium 0-6"
- pH 0-6"
- Soluble Salt 0-6" and 6-24" or 0-24"
- Organic Matter 0-6"
- Sulfur 0-6" and 6-24" or 0-24"
- Zinc 0-6"
- Iron 0-6"
- Copper 0-6"
- Manganese 0-6"
- Chloride 0-6" and 6-24" or 0-24"
- Calcium Carbonate Equivalent 0-6"
